Professional Summary

Frontend Engineer with experience leading frontend development and building production React and Next.js applications across SaaS and marketplace products. I've shipped features spanning campaigns, CRM, commerce, billing, communities, and account management, with a focus on application state, validation, responsive behavior, and failure handling.

Professional Experience

Feb 2024 – Present

Frontend Developer

Serlzo

- Lead frontend development across Serlzo's creator and member-facing products, including setting up frontend repositories, establishing development conventions and reusable patterns, and guiding implementation across major features.
- Built and shipped email, SMS, and WhatsApp campaign features, including a visual email-template builder, drafts, attachments, merge tags, test sends, audience selection, and API integrations.
- Implemented CRM contact-import review with dry-run CSV analysis, field mapping, validation, filtering, and API integration.
- Built features across product setup, communities, courses, billing, subscriptions, affiliate payouts, and team permissions; debugged API/cache state, payment-return flows, validation, loading/error states, and mobile edge cases.

September 2023

Enugu, Nigeria

Frontend Developer

Enugu State Tech Hub

- Built responsive frontend interfaces for client projects and integrated multiple service APIs against a microservices-based backend as part of a cross-functional delivery team.

November 2022 –

July 2023

Enugu, Nigeria

Frontend Developer Intern

Genesys Tech Hub

- Built frontend projects through weekly delivery assignments, collaborated on Scrum teams, published technical articles, and was named Frontend Intern of the Year 2023.

Selected Projects

TheDays · Independent Project

React · TypeScript · Node.js · PostgreSQL · Prisma

Built a habit and commitment tracker where progress accumulates across completed days rather than resetting after missed days; implemented a React frontend and Node.js/PostgreSQL backend covering authentication, persistence, daily tracking, and timezone-sensitive completion rules.

Felix & Gift · Independent Project

Next.js · TypeScript · Supabase · Cloudinary

Built a wedding website with a public invitation and gallery, anonymous guest photo uploads, and an authenticated admin area for content and photo moderation.

Skills

Frontend — React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Vite • **Application & tooling** — TanStack Query, TanStack Router, REST APIs, Vitest, Testing Library, Git, GitHub, Vercel
